

1000lt Grassland Sprayer

£7,267.50

Reference: BL114Q

Our Grassland Sprayer is a high specification sprayer which is compact and easy to use. A low centre of gravity design gives more stability while working on slopes. Combined with the close mounted slim-line design, there is improved front axle balance; allowing a smaller tractor to be used. Pump The Grassland Sprayer utilises high specification pumps. These are all positive displacement triples diaphragm pumps that are oil filled and self priming to achieve excellent performance. The pumps provide excellent resistance to any abrasion and corrosive chemicals for longer life. A high performance control system along with the standard anti-drip nozzles prevent chemical leaking from the nozzles, and ensures they only spray once the optimum pressure has built up in the line. Sprayer Features Compact, slim line design. UV protected tank, for long life. 80-140Lpm top quality 3 diaphragm pump. Boom Features Designed for durability - strong and fully galvanised. 2-way safety breakaway to prevent breakages upon contact with obstacles.
